# CARDINAL

*...the most spectacular  
SHRUB of this Century!*

**S 150 Cardinal Shrub** (Weigela Vanicek). We believe this to be the finest red-flowering shrub in America. In May-June every plant is simply covered from top to bottom with hundreds and hundreds of lovely rosy-red flowers. They are trumpet-shaped, 1 to 1¼ inches across. After this first big display, there are some scattering blooms throughout the season. If you cut off sprays of flowers and use them for bouquets, the plant will flower even more freely than if you left them on.

At Hamburg, the Cardinal Shrub has withstood 15 below zero without injury. It is so easy to grow, not particular as to soil. Thrives in full sun or part shade. It makes a shapely bush 5 to 6 feet tall with excellent foliage. Used as an untrimmed hedge, it will be the sensation of your neighborhood.

Look over your yard, whether large or small. You will find a spot where it will help make your home more beautiful. Plants set out this spring will bloom this season. We ship them to you POSTPAID, trimmed ready for planting, at the proper planting time for your locality.

# ROYAL PURPLE SMOKE TREE

**... the most striking shrub  
we have ever seen!**

**S 40 Royal Purple Smoke Tree** (Rhus Cotinus Atropurpurea, Royal Purple). From the moment the first leaf unfurls in early springtime until late autumn, here is an amazing shrub to make that sunny spot in your yard GLOW with rich purple color! At first, the foliage alone thrills you with its unusual shade of glossy purple. But then what a glorious surprise in mid-summer when feathery flowers as sheer as chiffon transform this shrub into a smoke-cloud of enchanting purple.

So colorful among the common green shrubs—and the filmy purple flowers and foliage make “conversation-piece” bouquets. Grows 8 to 10 feet tall but can be trimmed lower if desired. Marvelous for shrub borders or as an individual specimen! Completely hardy here at Hamburg, but we do not advise planting north of central Iowa.

**Selected Plants, POSTPAID . . . Each \$2.95, 2 for \$5.45**

**18 to 24 inches, POSTPAID . . . Each 2.50, 2 for 4.45**

**12 to 18 inches, POSTPAID . . . Each 2.00, 2 for 3.45**

# How to Order

In the comfort and privacy of your own home, you can look through this catalog and select Inter-State's Guaranteed Nursery Stock and Seeds.

1. Write your order for Nursery Stock and Bulbs on the order blank on the back of this page.
2. Write your order for Seeds and Supplies on the order blank at the back of the catalog between pages 82 and 83.

If you run out of our order blanks you can use any sheet of paper, but be sure to put your orders for Seeds and orders for Nursery Stock on separate sheets of paper. You can mail both orders in the same envelope. Seeds and Supplies are handled in a separate department and are shipped at once while Nursery Stock is shipped at the proper planting time *in your locality*.

### 3. Print or Write name, and address on all orders.

In making out your orders please write or print very plainly, giving your full name and complete address, street or rural route and postal zone if your city is zoned. Also list your nearest express office if it is different from your post office as we sometimes ship by *prepaid express* instead of parcel post unless you object. All members of the same family, living at the same address, please order under one name.

### 4. Order all items by catalog number.

This helps us give you better service and helps avoid mistakes. List quantity, variety and size of items wanted.

### 5. You can send us money order, draft or check.

If you send currency or cash, wrap it carefully and register your letter. A money order is a better way to send payment.

**Please do not ask us to ship C.O.D.** The post office and express companies make an extra charge for this service, which makes your cost greater.

**6. Handling Charge.** Please add 35c to your nursery order to help cover the increase in handling and packing costs. There is no handling charge on seed orders. Thank you.

**7. Sales Tax.** Customers living in Iowa and Missouri will add 2% to the amount of their order, which the Law requires us to collect.

## Mail Your Order Early

On page 3 is a list of premiums you get for ordering early. Be sure to list the premiums you wish on your order so all can be sent in one shipment. When you are through with your Spring Catalog, perhaps your neighbor would like to see it. Thank you.

Lovely colors on graceful spikes, 6 to 8 glorious flowers open at once and every remaining bud will open perfectly right out to the tip. They are fully described on pages 71, 72. We also assure you that they are beautiful, large flowers, exquisitely ruffled.

We send you first quality, fine bulbs 1 to 1¼ inches across (diameter). We can offer them at this special price only because we sell millions of Glads. Each variety is labeled and sacked separately. **GUARANTEED TO PLEASE YOU WHEN YOU GET THE BULBS AND ALSO WHEN THEY BLOOM THIS SUMMER.**

## AND THE MEN BEHIND IT

The Inter-State Nurseries are owned and operated by three brothers, Carl O., Leslie R., and David L. O. Sjulín (this is a Swedish name and is pronounced "Shoe-lin"). Practically born and raised in the nursery business, we have grown to be the Largest Direct-to-You Nurseries in America, with hundreds of thousands of customers. We have 1600 acres of the finest soil in the world, ideal for growing nursery stock.

## What you should know about Inter-State Nurseries

The most important facts are that back of this firm are life-times of nursery experience, plus the best nursery soil, and a sincere desire and effort to please and satisfy our customers.

Our soil, called Loess by the geologists, is very rare, occurring in only a few places throughout the entire world. Even in Iowa, famous for its rich soil, this Loess is rated something very special and super-excellent. We have a long growing season, time to make the husky plants you like to set out. And our winters are cold enough (sometimes 20 below zero) to assure hardiness. Normally rainfall is ample. But we have nearly 300 acres under irrigation where we grow perennials and such stock as needs more regular watering. In one of these fields we grew over a million Phlox, the very plants listed on Page 65.

We three brothers, Carl, Les, and Dave worked for a large nursery on Saturdays and school vacations. In 1919 we moved to Hamburg, establishing our own nursery, growing and selling at wholesale to other nurseries. In 1931 we decided that as long as we were growing the nursery stock, we should sell it Direct-To-You, the final customer. So we issued our first catalog Spring 1931.

Now as the years have gone by, we are aided by our sons, who have grown up in the business, and an exceptionally fine organization; many have been with us since our first catalog and even before.

### About this catalog

It is not just a sales book, but a Guide to Better Planting. We have tried hard to make it more helpful, better illustrations (but it is absolutely impossible to reproduce on paper the real beauty of nature). You will find new roses such as the 1962 All America Winners Christian Dior and King's Ransom on page 1, John S. Armstrong on page 39 and Golden Slippers on page 46. Perennials that are not only new but better, such as Penstemon Henry Hybrids on page 67, New, large-flowered Phlox on page 65, Space Age Mums on page 58 and New Hardy Asters on pages 54 and 55. And, the fabulous new Ballerina Begonias are pictured on page 84. And, see pages 18, 19 and 20 for America's Largest Selection of Dwarf Fruit Trees.

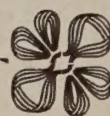

### Finally

This then is a short story about the Inter-State Nurseries, a national institution, the largest of its kind. It has helped to make America More Beautiful, More Fruitful. Its proudest possessions are the thousands of letters telling about the satisfaction of making homes better places in which to live.

# Important Information

## It's Easy to Order by Mail from Inter-State

You can relax in the comforts of your home while you order by mail from Inter-State Nurseries. Pick out the items you want to plant this spring from the 84 colorful pages of this catalog. Write your order for Nursery Stock on the order blank opposite page 2 or use the one opposite page 83 if you order Seeds or Supplies from pages 6 & 7. Fill in your full name and complete address and enclose your remittance either by money order, check, bank draft or currency. If you send currency, please register your letter. Mail to us and when the proper planting time comes for your locality, we will ship your order Direct-to-You. Plant the stock, watch it grow and enjoy the added beauty and fruitfulness of your home.

## We Pay Postage (Alaska and Hawaii orders sent air mail collect), except large trees are shipped express collect

Please note that most items in this catalog are DELIVERED TO YOU, POSTPAID. (Customers in Alaska and Hawaii should write us for air mail costs.) This means that you pay no postage charges on those items. Some Fruit and Shade Trees listed "Not Postpaid" are too large to go by parcel post. They are shipped by express, you pay the express charges. **We include extra stock to help pay the express.**

In some orders there are trees which must go by express and also some stock (shrubs and roses) which would go parcel post. To avoid making two separate shipments of trees, shrubs and roses (see below), we send these entire orders by express. For this privilege, we include extra stock which has a greater value than the additional express charges amount to.

## Nursery Stock is shipped at proper planting time

Nursery Stock and Seeds are not shipped together. Seeds and Supplies are shipped at once. Nursery stock is shipped at proper planting time in your locality. We are equipped so that we can start shipping to southern states early in the year. As the season advances, we keep shipping farther north until in May we are shipping to the most northern states. If you want your order shipped on a particular date, please write this on your order.

## SEPARATE SHIPMENTS

### Please read this carefully

Trees (both fruit and shade), shrubs, hedging, small fruit plants, vines (except Clematis) and roses are shipped first, because they should be planted first as they can stand late frosts and cold snaps after being planted. But perennials, bulbs, clematis, should not be planted as early, therefore they are shipped separately often 2 or 3 weeks later. So your order may be sent in several separate shipments in order that you get your stock at the best planting time to give you the best results. For example, if you have ordered roses, shrubs or trees and also perennials or bulbs, you will get the roses, shrubs or trees first and the perennials or bulbs later. After you get the roses, shrubs, you need not write us about not getting perennials or bulbs as we will ship them a little later on.

## New Method of Wrapping

We are now using a new product, Polyethylene or Polyethylene-coated kraft paper, which retains the natural moisture of plants for several days yet allows them to "breathe". Exhaustive tests by leading colleges and universities and practical use have proven this to be the best method of shipping nursery stock. It means that your nursery stock will arrive in perfect condition **EVEN WITHOUT MOSS OR OTHER PACKING MATERIAL**. If shipment arrives during a spell of bad weather, you can leave it in the package for several days. Of course, you should plant as soon as you can because the sooner you get it in the ground, the sooner it starts growing and the quicker you get flowers or fruit.

# Plant Nut Trees for profit, beauty, shade and food

Thomas Black Walnut, Actual Size

## THOMAS BLACK WALNUT

**N 1** When the long cold evenings of winter come, what a pleasure it is to crack some Black Walnuts to eat or for fudge, or for mother. She can use them in so many different ways and what a delicious flavor they add. Everybody likes Black Walnuts, but the common Black Walnut is small and it is hard to get out the meats.

Now you can have the Thomas grafted Black Walnut, which is giant size with kernels much larger, better flavor and much easier to get out. Thomas is fast growing and produces very large nuts. It is the greatest nut tree of the country. You should plant it because—

1. It bears very young, often second year after planting. A mature tree will produce 15 to 40 bushels of giant size nuts which sell for \$4.00 or more per bushel.
2. The nuts are immense size as pictured above. They crack easily so the meats come out in halves and quarters. A bushel of nuts cracks out 10 to 12 pounds of meats.
3. The nuts are delicious flavor and because they are so large and plump and come out in halves and quarters they sell for \$1.25 or more a pound.
4. It will grow in every state where Black Walnuts are native. It is not particular as to soil. Plant 50 feet apart.
5. In time the tree will grow large and walnut logs are scarce. If you wished you could sell the trees for lumber at a good price. These are grafted trees and grow rapidly.

## CHINESE CHESTNUTS

**N 17** These Chinese Chestnuts are seedling trees from selected parents which have been found to be superior. They start bearing very young, generally a year or two after planting. The nuts are large, sweet, fine flavor. They develop into large, handsome trees, attractive enough to plant in your lawn as a shade tree. We do not recommend planting them where temperature regularly falls to more than 15 below zero. Yields will be larger if you plant two trees so they can cross-pollinize.

## STUART PECAN

*Thin Shelled*  
*High Quality*  
*Bears Heavily*  
*and Regularly*

**N 42 Stuart Pecan.** This is the hardiest of the regular Pecan varieties which are grown throughout the South. It lives, bears and matures its nuts as far north as Kansas City, Missouri. We do not advise planting north of Kansas City. Stuart is very thin shelled and cracks easily into halves. The nuts are high quality with that real, delicious Pecan flavor. The tree with its rich green foliage, perfect form is attractive enough to plant in your front yard. It bears heavily and regularly, large nuts just like those you buy. This outstanding variety not only can be planted farther north than other Pecans but is also one of the best kinds grown in the regular Pecan sections of the South. If you live south of central Missouri, you should plant a Stuart Pecan tree and grow the delicious nuts right in your own yard.

**N 40 Hirschi Pecan** is a new variety found near Kansas City by Mr. A. G. Hirschi, the eminent authority on Nuts. The nuts are good size, very thin shelled and crack easily into full halves. The quality is very high, having the rich full flavor of the native pecan. It lives, bears and matures its nuts fully near Kansas City.

## HARDY ENGLISH WALNUTS

*Carpathian*

**N 32 Hardy English Walnut, Carpathian.** You know what the popular English Walnuts are which are grown on the west coast. These Carpathian English Walnuts are just like them, thin-shelled, fine flavor but the Carpathians are far hardier. They will live and bear in all but the most extreme cold states like Minnesota, Dakotas, etc. They develop into quite large specimen trees, magnificent in the lawn or back yard.

Mr. Hirschi selected this fine flavored, thin-shelled walnut for its hardiness and heavy bearing. And it makes a beautiful shade tree, perfect for lawn or back yard planting.

Newly planted Walnut, Pecan and Chestnut trees are slow to start. After digging hole, fill it with water, twice is better than once, to thoroughly soak the sub-soil. After planting, water again. Then if weather is dry, water every 2 weeks. When you water, do it thoroughly. The moisture must get down to the roots. We have found that using Ra-Pid-Gro (page 7) when planting and several times during the summer is beneficial.

## WONDERFUL, TASTY

### Rhubarb

Rhubarb is the earliest spring vegetable. Some list it as a fruit because once planted it lasts a lifetime, coming up year after year without special care or attention. Plant 3 to 4 feet apart, covering the crown with 2 inches of soil.

We do not list the common Rhubarb because these two kinds are so far superior. In the first place they are much larger, far better flavor, sweeter and the skin of both is so tender that they need not be peeled. Also you can use them for many weeks, spring and summer. Both are very productive with large, tender, juicy stalks. Ordinarily these are seedless but if a seed stalk should develop, cut it off at once as it takes strength from the plant. POSTPAID.

**A 65 Chipman's Canada Red**—This new rhubarb has large stalks that are red from top to bottom, even the flesh is red. It does not lose this rich color in cooking. Juicy and sweetest of all, takes less sugar. Seedless. Skin is so tender you need not peel it. Very productive, you can pull the stalks all spring and summer.

**Each \$1.10, 3 for \$2.95, 6 for \$5.45**

**A 61 MacDonald Red**—A tremendous producer of giant size stalks all spring and summer. Stalks are 18 to 24 inches tall, many half as thick as your wrist. Seedless. It is 2 to 3 times larger than common rhubarb, far more tender, delicious and sweeter. Its bright red skin and tender flesh makes very attractive and fine tasting sauce and pies. Skin so tender it needs no peeling.

**Each \$1.10, 3 for \$2.95, 6 for \$5.45**

# LUSCIOUS *Black Raspberries*

They ripen after strawberries and just ahead of red raspberries. Plant them 3 to 4 feet apart in the row and the rows 6 to 7 feet apart. You can plant a row across the back of your garden. Our Planting Guide, sent with all orders, gives you easy-to-follow instructions about taking care of them. If you make a mulch of lawn rakings or a mixture of straw and leaves and put around the plants in the spring, you will have almost no weeding to do and besides this mulch helps hold moisture so the plants produce better.

**A 94 Bristol**—A tremendous producer of large, luscious, glossy jet-black berries even in thin soils where other varieties are failures. The delicious berries are not only sweet and juicy but have an unusually rich black raspberry flavor. They are almost seedless which makes them especially fine for making juice and for freezing. We receive reports from over a wide territory telling of the success of Bristol even in southern states where other varieties fail. POSTPAID.

The result is this outstanding new variety with that sweet, delicious, real strawberry flavor. The strong, vigorous plants produce quart after quart of very large, bright red berries and the size holds up to the last picking. Cyclone topped all other varieties in fruit production tests at Ames in 1960. Fine for eating fresh out of the patch or superb for freezing and preserves. Self-pollenizing. Postpaid.

**F 81 Montmorency**—This is the most popular of all cherries, largely because it is the best of all for canning. And it tastes mighty good to eat fresh right off the tree, especially when fully-ripened, home-grown. The fruit is large, firm, very fine flavor. Ripens about 10 days after Early Richmond. The tree is a rather short grower so the fruit is easily picked. Bears heavily and regularly. Be sure you have at least one tree in your yard. It is handsome enough that many people plant it in their front yard. If you have room for but one cherry, then we recommend this. You simply cannot beat it for eating fresh, for canning, for freezing, for pies, cobbler, preserves. This is the virus-free Gilbert Strain. Self-pollenizing.

## METEOR, New, Finest Pie Cherry

**F 85 Meteor**—A new cherry from the Minnesota Experimental Station. The fruit is very large, rich red and excellent flavor. Good for eating fresh, for pies, cobbler, preserves and freezing. Very hardy, it will grow in cold sections where cherries could not be grown heretofore. Healthy, very resistant to leaf spot. The original tree growing near Minneapolis has never failed to bear fruit since it started many years ago. Bears young. Attractive enough to plant right in your front yard. Heavy bearer. Self-pollenizing.

**F 79 Early Richmond**—The first cherry to ripen. In June, full of the bright red, juicy, delicious fruit. Self-pollenizing.

## America's Largest Selection of

Inter-State is doing more basic research in the production of Dwarf Fruit Trees than any other nursery in America. **These Dwarf Fruit Trees are becoming tremendously popular simply because their small size makes it possible for millions now to grow their own delicious home-grown fruit even if their yard is small.** Orchardists are also planting them because they bear younger, are so easy to take care of, and their fruit is larger. See page 20 for Dwarf Apple Trees.

**F 25 Golden Giant** (Plant Patent No. 1,053). This is the finest Apricot we have ever seen. The size is immense, 2 inches across and over 2 inches long, even larger than pictured. The color itself is appetizing, golden-orange with a light blush. For flavor we simply tell you that it is the finest you ever ate, sweet, juicy, tender, delicious. Even if picked fairly green, it develops this fine flavor whereas ordinary apricots when picked green taste insipid. It is a tremendous bearer. Has missed only 2 crops in many years at Grand Junction, Colorado, the home of the originator, Dave Moore. It has borne there when all other varieties failed. It makes a large attractive tree so you can plant it in your yard if you are short of room. For eating fresh, for canning, for preserves, for freezing, **GOLDEN GIANT** is in a class by itself. In apricot fruit districts we recommend that orchardists try some. We believe they will find this is just what they have been looking for. Its huge size, attractive color, fine flavor top the market. **Golden Giant** is **SOLD ONLY BY INTER-STATE NURSERIES**. Order today to make sure that you get yours this spring.

**F 29 Hungarian**—Large fruit of the highest quality. Hardy and good bearer. We recommend this highly.

# DELICIOUS, EASY-TO-GROW PEARS

Pears grow in any ordinary soil, even in sod, right in your yard. Plant 20 feet apart. Two trees, alike or different varieties, planted near each other so they can cross-pollenate, will both produce more heavily than if planted alone. To tell when Pears are ready to pick, place the palm of your hand under a Pear, raise it gently and if the stem snaps off easily from the limb, they are ready to pick. Then put them in a cool, dark place to ripen and you will have Pears of the highest quality.

## Maxine Large Size—Delicious Flavor Our Most Blight Resistant Pear

**F 91 Maxine**—This is by far the finest hardy pear ever created. It has everything a great pear should have—large size, beautiful golden-yellow color, rich delicious flavor even more luscious than the famous Bartlett and, most important of all, it is the most blight resistant variety we know. It has never shown any blight in our orchards when almost all other varieties have been damaged. The snow-white, juicy flesh simply melts in your mouth. Bears young, heavily and regularly, ripening in late summer.

**F 90 Bartlett**—Most popular summer pear. Fruit is large, juicy, sweet, high quality. Plant in poor ground where it is less likely to blight.

**F 93 Beierschmitt**—Blight resistant, heavy bearer. Fruit is large, yellow with blush, delicious flavor. Ripens in late summer.

**F 88 Cope's Seedless Pear**—A Pear That Has No Seeds and No Core. The fruit is large, tender and sweet, juicy and delicious. If there are other varieties close, then Cope's may have a few small, immature seeds.

**F 92 Kieffer**—The most widely planted winter Pear. Bears young and heavily. A healthy, hardy, vigorous grower.

**F 95 Patten**—Ripens in August, large, golden-yellow with luscious flavor.

**F 96 Seckel**—Called the Sugar Pear because of its sweet, delicious flavor. Fruit is not large but the highest quality. Ripens in late summer.

## NEW, IMPROVED Blueberries

### Luscious Fruit—Attractive in Flower, Fruit and Foliage

These 3 new, improved blueberries are far superior to common varieties. They have larger fruit, bear more profusely, better flavor and the bushes are so attractive you can plant them in your front yard with regular shrubs. The white flowers are lovely in the spring followed by the beautiful blue, luscious fruit. The waxy rich green foliage colors red in the fall. Wonderful for eating fresh, for pies and freezing. This is an all season collection of varieties that start ripening in late June continuing through early August. Plant in a cluster, 4 to 6 feet apart. Branched 3-year old plants, almost 2 feet tall that will bear next year after planting.

Blueberries prefer an acid soil. You can make your soil acid by mixing peat moss (page 6) with your soil or by mixing a handful or two of common sulphur (get at local drug store) with soil when planting. Water thoroughly. Plant 2 or more varieties so they can cross pollenate.

## HANDSOME *Bridal Wreath*

**H 3 Bridal Wreath** (Spirea Van Houtte)—This photograph shows the beauty of Bridal Wreath, America's most popular and widely planted untrimmed flowering hedge. Millions of small white blooms cover the gracefully arching branches, every spring, without fail. Requires no special care and lasts a lifetime. Perfectly hardy, grows everywhere, in full sun or partial shade. You see it all over America and everywhere it is attractive and thriving. Makes a marvelous natural hedge or screen 5 to 6 feet tall. Plant 2 to 3 feet apart.

## AMAZING ROSA MULTIFLORA

**H 7 Rosa Multiflora Japonica**—The conservation people recommend this for a living hedge where you have plenty of room, for erosion control and an excellent wild life refuge. However, we do not advise using it on small city lots because when not trimmed it makes a bushy, thorny plant 6 to 8 feet tall and almost as wide. Other hedges are better if you want a trimmed hedge. Has white flowers in spring followed by red fruits which the birds like. Hardy up to central Iowa. Plant 18 to 24 inches apart.

## *Winter-Green* The Perfect Hedge, Holds Foliage All Winter

**H 154 Winter-Green** (Euonymus Erecta, Small Leaf)—This shrub is very much like the Winter-Green pictured on Page 27. But its leaves are smaller and it grows hardly 3-feet tall and is almost as wide. Makes a very dense, bushy plant that makes an ideal hedge because it never needs to be trimmed. Also it holds its foliage all winter. At first the leaves are a rich deep green then gradually take on an attractive purple tinge. Thrives in sun, part shade and full shade. If you want a narrower or smaller hedge, just a trimming or two, a year, will give you exactly what you want. Plant 18 inches apart. The Specimen plants are heavily branched, and will give you a good hedge effect when planted. Winter-Green gives you an evergreen hedge at a fraction of the cost of Evergreens. These are extra-fine plants this year.

## HARDY *Privet* HEDGE

**H 2 Hardy Russian Privet** (Amoor River North)—Is by far the most popular hardy trimmed hedge in the northern states. It makes a permanent hedge, lasting for generations. Not only adds beauty, it also protects your yard especially if you have a corner lot. It is fine for a division line between yards. Can be trimmed to any desired height, making a thick, dense hedge, without thorns, right down to the ground. Requires trimming only twice during the summer. But if you trim it 3 or 4 times, it becomes more dense and bushy. Leaves are rich, dark green and hang on until very late fall. Plant 1 foot apart.

**H 9 Tatarian Honeysuckle**—Thrives all over. Can be trimmed like a normal hedge. If not trimmed makes a magnificent, dense hedge screen 8 feet tall. Pink or creamy flowers in the spring, followed by bright red berries. Grows in full sun or part shade. Ideal for fast-growing flowering tall hedge or screen. Plant 12 inches apart for trimmed hedge, 2 to 3 feet apart if untrimmed.

## CHINESE ELM for Hedge or Windbreaks

**H 1 Chinese Elm**—Is America's fastest growing hedge, making a good showing in just a few months. It is the first to leaf out in the spring and one of the last to shed in the fall. You can trim to any desired height from 3 to 10 feet, as a hedge or tall screen. The more you trim it the more dense and compact it becomes. We recommend that after planting, you cut off nearly all the top, leaving only 5 to 6 inches above ground. This will make a bushier hedge. Plant 8 inches apart. Also makes a fine WINDBREAK—fast growing, drought resistant and economical. For windbreaks, plant 5 to 6 feet apart in 2, 3 or 4 rows with alternate spacing. Do not trim after planting.

1 Red } Postpaid

The South's most beautiful shrub, can now be grown farther north by planting this hardier strain. However, we do not advise planting it north of southern Iowa. Grow it just like Everblooming Roses, giving winter protection by mounding up dirt before cold weather comes. It blooms on new growth so it does not matter if the old top is entirely killed. The flowers have lovely clear colors with a soft crepe-like texture. They sometimes are slow to leaf out the first year. They stay dormant for several weeks. Then the leaves come out and they soon start blooming. Postpaid.

## NEW, IMPROVED *Winter-Green* Stays Green All Winter

\$155 **Winter-Green** (Euonymus Manhattan)—This is an improved selection of one of the most attractive and versatile of all shrubs. Brighter green foliage and it holds this rich green color through the winter far better than the regular Winter-Green. *The lustrous, glossy green leaves stay on all winter*, especially when planted in part or full shade. Makes a shapely bush 5 to 7 feet tall but can easily be trimmed to any desired height. Fine for foundation planting, as specimens, and makes a wonderful hedge. Thrives in sun or part shade, or even on the north side of house. Hardy here in southern Iowa but we do not advise planting farther north. This fine shrub can be used instead of evergreens. Easier to grow, not as expensive, and grows faster.

## *Hardy Firethorn, Kasan*

*Our Most Attractive, Fruiting, Evergreen Shrub*

\$37 **Hardy Firethorn** (Pyracantha Kasan)—This is the hardiest of all the Firethorns we know. It has come through six winters here at Hamburg (down to 20 below zero) without injury. However, we do not recommend planting north of central Iowa. It is by far the most attractive, hardy, fruiting, evergreen shrub. Usually starts bearing the second year after planting. The plants are covered with large trusses of white flowers in the spring, followed by brilliant, flaming orange berries which hang on into winter. It makes a very dense shrub with handsome rich green foliage which becomes a magnificent purple during the winter. In foundation plantings, borders or as a specimen it is outstanding all year. Find a spot where this shrub will help make your home more attractive.

BEAUTIFUL  
NIKKO BLUE

## Blue Hydrangea

**\$ 55 Blue Hydrangea.** We offer a new variety, Nikko Blue, which all summer has immense flower heads, often a foot across, that last for many weeks. In ordinary soil the flowers are pink. In acid soil, they are blue. You can make your soil acid by mixing in one half Peat Moss (see page 6). Or, you can water twice a month with a tablespoon of aluminum sulphate per gallon of water to make the color a rich blue. If you cannot get aluminum sulphate from your drug store we will send you some for 50c postpaid.

Does best in partial or full shade, even on north side of house. Grows only 3 to 4 feet tall making a well rounded shrub just as wide. A group of 2 or 3 will enhance the beauty of a picture window in your home. Where winter temperature goes below zero give protection just like roses by mounding up 10 to 12 inches of soil around the plant before severe freezing weather. We do not recommend planting north of central Iowa. Our plants are well rooted field grown (not small greenhouse potted plants). Becomes more popular each passing year.

## NEW IMPROVED Azaleas

**Larger Flowers · Brighter Colors · Finest Plants**

Several years ago we asked our Azalea grower in Holland to increase production on these named varieties because our own tests here at Hamburg proved them to be superior to the common Azaleas. The flowers are brighter, larger and produced more profusely and the plants are more vigorous. In May-June the flowers cover the bush giving a display of color unequalled by any other shrub. Prefers partial shade and a slightly acid soil. You can make your soil acid by mixing a liberal amount of peat moss (page 6) with the soil when planting or by watering with a tablespoon of common sulphur per gallon of water several times during the summer. These fine plants are 3 years old, branched, budded and WILL BLOOM THIS SEASON. Each plant is individually root wrapped to reach you in perfect planting condition. Postpaid.

# New Hamburg Hybrid Elm

**T 3 Hamburg Hybrid Elm.** This is an entirely new tree, a Hybrid Elm, the fastest growing tree we have. In just ordinary soil and under normal conditions, it grows 6 to 10 feet a year. It grows so rapidly that in just five years after planting, you will have a handsome shade tree. Neither winter's cold nor summer's heat bother it the slightest. And most important of all, it has proven to be immune to the phloem necrosis virus, one of the dreaded diseases which is killing American Elm trees. It is not immune to Dutch Elm disease. Makes a shapely tree with large, dark green leaves. Withstands very well wind and sleet storms. Perfectly hardy here. An amazingly rapid grower, there are countless thousands of homes where it will quickly bring shade and beauty.

**T 7 Crimson King Maple** (P.P. 735). Truly a King of the ornamental trees, it is distinctive, colorful, captivating. The foliage is a deep maroon-purple from the time it leafs out until the leaves fall. This rich color adds an exhilarating contrast to the prevalent greens. It will live for many generations, becoming more attractive each year. Now we are receiving enthusiastic letters of praise. The trees we send you are one year old top, 3 year old roots. They are especially fine specimens this spring. They will start branching the first summer and every leaf, every inch of growth will be a delight.

## Improved *Scarlet Maple*

**T 10 Scarlet Maple** (Rubrum Schlessingeri). For the first time last spring we offered an improved strain of one of America's most colorful, easy-to-grow and disease free shade trees. In the spring the tree is full of scarlet flowers followed by bright red seed. The spring and summer foliage is luxuriant deep green. In the fall the leaves are a brilliant rosy-scarlet, a glorious addition to any yard. Under normal conditions this colors earlier and brighter than the common Scarlet Maple. Makes a large, shapely, long-lived tree. Grows coast to coast.

An All America Rose Selection Award indicated by this symbol  is the highest honor a rose

can achieve in America. A rose has to be superior in every respect to win an award because it is tested by experts in trial rose gardens in all sections of the U. S. Not only are the flowers superior but also the plant and habit of growth. They cost but little more than other varieties and are well worth the difference.

# New, Hardy

**Bloom Spring to Frost**

For mass display of color, hardly anything can equal climbing roses in full bloom. Used on porches, arbors, trellises and trailing over fences. All these climbers are hardy, but we recommend that winter protection be given in cold sections. Set 3 to 4 feet apart. Dr. J. H. Nicolas, Blaze, Blossomtime, Carrousel, Paul's Scarlet, Gladiator, Golden Showers, Coral Pillar are ideal for trellis. They are Pillar type and do not grow as vigorously as the others. Gold Rush, New Dawn, No. 82 Pink and White Dawn grow more vigorously and can be used for trellis, porch, pergola or fence. City of York is ideal for pergola, porch or fence as it is such a strong grower. We recommend using Ra-Pid-Gro (page 7) when planting. All climbing roses are POSTPAID.

We call them our Gold Medal Roses because of the great number of high awards they have won, including several All America Award Winners. There are none finer available at any price. Charlotte Armstrong, Crimson Glory and Peace are 3 of the greatest Roses ever created. Plant several this spring. In just a few short weeks you'll be enjoying their beautiful flowers, and, you'll have blooms all summer, so lovely in the garden or simply gorgeous in bouquets.

We offer 3 sizes of plants. Those who prefer extra large bushes, will select the Large Specimen Plants. These are big and husky, well-branched and heavily rooted, the cream of the crop. However, we assure you that our Select 2-Year No. 1 Plants will satisfy critical buyers. They have made Inter-State Roses famous all over America. The Standard 2-Year Medium (No. 1½ grade) Plants are smaller than the No. 1. They will bloom this summer and are a good value.

# Inter-State's New Superior Hardy

All of the outstanding Perennials below were selected from our extensive trial plantings of hundreds of new Perennials as being superior in color, flower form, vigor and the amount of bloom. They were thoroughly tested here at Hamburg and found to be completely hardy and easy to grow. Be sure to plant some or all of them this spring. They will bloom this season adding glorious color to your garden. Planting instructions are included with every order. Postpaid.

## Giant Primroses *Pictured on Page 55*

Plant these Giant Pacific Hybrid Primroses (*primula polyanthus*) this spring. In just a few weeks they will burst into a rainbow of lavishly beautiful blooms. Large flowers, many the size of a silver dollar, much larger than pictured on page 55. Shade loving, they do fine on the north side in full or partial shade. Plant them in beds, or borders. Colors range from delicate pastels through radiant, vivid tones to the boldest, most brilliant hues Mother Nature can produce. These are vigorous plants with strong crowns that will produce an abundance of flowers, this spring. Next spring the plants will be larger and the display almost unbelievable. Postpaid.

## Fall-Blooming Hardy Asters

Recently we imported over fifty new Asters from England (where most of the new varieties originate). Four of them were so outstandingly superior that we immediately decided that we would offer them as quickly as possible. Last fall these four Asters were again far better. Now this spring you can plant them in your garden and this fall you will agree with us that never have you had such lovely Aster flowers. Hardy, grow in most any ordinary garden soil, in full sun or part shade. Lassie, Marie Ballard, and Crimson Brocade will make fine bushy plants around 30 inches tall. White Wings grows only about 2 feet tall. All are free-blooming, simply covering the plant. Pictured on page 55.

**M 33 Lassie** is the most exquisite pink you ever saw, a delightful clear pink color, with not the least trace of lavender.

**M 37 Marie Ballard** is the finest blue we have ever seen, a charming medium shade of true blue.

**M 38 Crimson Brocade.** Here is a red without purple tones, a bright shining color that is a tremendous improvement in red Asters.

**M 41 White Wings** is purest snow-white with golden center, the largest, most-perfect, most beautiful white Aster we have ever seen.

## NEW GOLDEN SUNSHINE ASTER

**M 43** This is the first yellow Aster we have ever offered in over 40 years of nursery experience. It makes a strong plant 3 to 4 feet tall, covered with bright yellow blooms for many weeks in late summer and early fall. New and very scarce.

**Each \$1.25, 3 for \$3.00**

## Giant Violas, *New English Bedding Varieties* *Pictured on Page 55*

These new Violas have created more attention and comment than any new perennial we have had for years. They are far better than ordinary Violas. The flowers are giant size, large as pansies, fragrant, with long stems. You can pick flowers daily from spring to fall. In fact the more you pick, the better they bloom. In just a few weeks the plants will make clumps almost a foot across with dozens of flowers. Plant in a well-drained spot, north side of a building is perfect but they will grow in part sun, part shade (afternoon shade preferred). These are true perennials. In cold states we suggest a winter protection by first putting on some small evergreen branches or empty berry boxes then covering with a good six or eight inch mulch. You and all who see them, will love them. Postpaid.

**Your choice, alike or assorted Each \$1.00, 3 for \$2.50**

**M 91 Better Times** has very large primrose yellow flowers, extremely free blooming. New, scarce and a "must-have."

**M 92 Mt. Spokane** is a new selection. Flowers are large, snow-white, freely produced.

**M 93 Royal Purple** came to us from Mr. Abbey, the well-known Vermont horticulturist. Flowers are simply magnificent, very large, a true Royal Purple. Good grower, blooms from spring to fall.

## Purple Showers HYBRID VIOLET

**NEW! Pictured on Page 55**

**M 95 Each 85c, 3 for \$2.25, 6 for \$3.95 Postpaid**

Here at last the hardy, long-lived Hybrid Violet that we have been looking for. Purple Showers has the exquisite delicacy and velvety richness of color of a pampered hot-house prima donna . . . with the vigor, hardiness of a wild woods Violet. It combines the freedom of bloom of the Viola with the ruggedness of the Violet. You will thrill to its abundance of color spring, summer into fall, a deep rich intense glowing purple that holds its vivid color right thru summer's heat. Makes a luxuriant plant, almost a foot across the first season, and holds its rich green foliage all winter. It will thrive on the north side in full or partial shade. Low-growing, makes a wonderful showing in beds or borders. The flowers are large, often 2 inches long and come singly on 6 to 8-inch stems.

## Indian Jewels HYBRID PENSTEMON

**M 237 Each 60c, 3 for \$1.45, 6 for \$2.45 Postpaid**

**M 237 Penstemon Indian Jewels** (Flathead Hybrids). This new hardy perennial was developed by Mr. Glenn Viehmeyer of the Nebraska Experiment Station of North Platte, Nebraska. Indian Jewels captures all of the beauty and vigor of the native Penstemons of the western prairies with the exquisite form of the garden varieties. They bloom over a period of many weeks in early summer and, if the old stems are cut off, new stems will appear producing even more flowers. The colors range from beautiful shades of red from crimson to scarlet and rose, charming hues of pink, lavender, purple and even a few touches of blue. Striking in the garden and really something special for bouquets, and arrangements. Easy to grow, will bloom this summer. Select field-grown plants. Pictured on page 55.

## PENSTEMON, PRAIRIE DUSK, NEW for 1962

**M 233 Penstemon, Prairie Dusk.** Another outstanding new Penstemon from Viehmeyer. Similar to the Indian Jewels above but the color is a rich purple. Graceful spikes 18 to 24 inches tall are lovely in garden or ideal for bouquets and, cutting makes them bloom even more freely.

**Each 75c, 3 for \$1.95**

**M 231 Penstemon, Prairie Fire.** A perfect companion to the Prairie Dusk above. The bright scarlet-crimson flowers start blooming in early summer. They will bloom all summer if you remove the old stems.

## *Vinca Minor, our best ground cover*

**M 259 (Periwinkle).** This is by far our best ground cover, an improved strain which produces more and larger flowers. In early summer it is a profusion of bright blue flowers set off beautifully by glossy green foliage that stays green summer and winter. This Vinca not only is exceptionally good for planting in shady, hard-to-grow places, but it also grows in full sun or part shade. We send you 4 divisions in a bunch. Plant these divisions 4 to 6 inches apart and in a year or two you will have a solid carpet of green. Excellent to plant around Lilies as it protects their roots summer and winter. # Grow Prize Dahlias

Dahlias are the largest and most beautifully colored of all the late summer and fall flowers. Easy to grow, we send simple planting instructions with every order. For exhibition, nip off the side branches allowing only a few main stems to grow. For lots of flowers, nip the ends of the main shoots when only a foot or so tall, making them branch. A young, small to medium-size bulb will do much better than a large, sappy, over-grown bulb. Even though Dahlias are planted late, we suggest that you order them early. They will keep perfectly in a moderately cool place, until planting time. ALL DAHLIAS ARE POSTPAID.

**C 58 Peace.** The greatest rose ever created. The perfect buds open slowly into large, fragrant, fully double flowers. Its greatest charm is the changing panorama of colors. The buds are rich gold edged cerise. As the outer petals unfold, the gold changes to canary then lightens to creamy ivory. The cerise edge gradually deepens and becomes broader so the fully open flower appears a sparkling cerise with a creamy-yellow base. Last unusually long, beautiful at all stages. A vigorous, healthy, free-blooming bush.
